Education

Zagazig University, Zagazig, Egypt.

BSc. in Computer Science.

September 2021 – July 2025

Projects

E-commerce App

2024

- Built an e-commerce application using React and ReactRedux, allowing users to browse, select, and purchase items conveniently.

Repo: [Source Code](#)

Youtube Clone

2024

- Developed a YouTube clone application using React and Tailwind CSS, integrating it with YouTube's API to fetch and display videos, enabling users to search and watch videos seamlessly.

Repo: [Source Code](#)

Curd App

2024

- Created a CRUD application using React, ReactRedux, and JSON Server, empowering users to manage items by adding, editing, and deleting them seamlessly.

Repo: [Source Code](#)

Nike Website

2024

- Simple website application using React and Tailwind CSS.

Repo: [Source Code](#)

Technical Skills

Programming Languages

- Good knowledge: C++, JavaScript, Python, TypeScript
- Intermediate Knowledge: Java

Technologies

- Good knowledge: HTML, CSS, React, ReactRouter, ReactRedux, BootStrap, Tailwind, MaterialUI, NextJS, ThreeJS, ReactIntersection, Shadcn, Motion.

Activities

Competitive Programmer

- Developed knowledge and proficiency in a variety of core computer science topics, including but not limited to sorting algorithms, linear and non-linear data structures, and the greedy algorithm. Acquired understanding through independent study and formal coursework, with a focus on practical applications and problem-solving. Continuously seeking to expand and refine skills through ongoing education and participation in coding communities.
